

# I want to have powerful formulation at the heart of my manufacturing ERP

- I mix materials together to make my products

The **formulas or recipes** your production people use need to be exactly the same as your R&D people created them. Your formulas need to be on the computer, but spreadsheets just don't cut it anymore.

You mix ingredients or materials together. Sometimes they undergo a chemical reaction, or you cook the mix, and you need to see the resultant properties.

BatchMaster specializes in helping you manage the product development process from sample requests to material property-based formulation to version control right through to production management.

And we have a multitude of satisfied customers who have achieved tight formulation control and met all regulatory standards as a result. To take control of your formulation process, [click here to "Get More Information"](#), and let us tell you our story.

The extra cost of unnecessary **inventory** comes right off your bottom line. Your inventory levels are too high, but you are powerless to control them.

Any time a transaction is entered in BatchMaster, inventory is immediately updated so you have instant and total control over your inventory levels. Everyone, and everything, is linked together – handheld barcoding in the warehouse & plant, sales order processing, purchase order receiving, production.

Our customers report 99% inventory accuracy while growing to 5 and 10 times their original size.

They do this in process-batch manufacturing as diverse as food, beverage, nutraceutical, supplements, cosmetics, cosmeceutical, personal care, paint, coatings, pharmaceutical, and all sorts of specialty chemicals such as rare earth metals and alloys.

If your inventory is not as controlled as it should be, [register for one of our weekly webinars](#) and we will show you how it is done.

The FDA requires you to achieve a **lot recall** in no more than 4 hours. If you are faced with one now, you might just get there – but everything will stop while many people bring together information from many different places because you have a mix of computerized sales order processing and purchasing, word documents and spreadsheets.

BatchMaster brings it all together in one integrated ERP system, you will be able to do a full recall in mere seconds.

Our customers meet the most stringent audit requirements of their customers.

You can too, [by clicking on "Get More Information"](#) to find out how, or [join one of our weekly Webinars](#) to see it happen.

## BatchMaster ERP Application Solutions

### Supply Chain Management

- Manufacturing
- Inventory management
- Sales Order Processing
- Purchasing
- Warehousing / Mobile Inventory Control
- Master Production Scheduling (MPS)
- Materials Requirements Planning (MRP)
- EDI

### Accounting

- General Ledger
  - Accounts Payable
  - Accounts Receivable
  - Foreign Currency
  - Microsoft Portal
  - FRx Reporter
- ### Business Intelligence
- BatchMaster BI, powered by QlikView
  - Operational Dashboards

### CRM

- "In-context" customer communications
  - o Sales Opportunities
  - o Service Requests & Tracking
  - o Integrated Email
  - o Sample Management communications

### Enterprise Resource Planning

- Advanced Planning & Scheduling
  - o Production Scheduling
  - o Sales Delivery Planning
- Statistical Forecasting
- Routing

### Compliance

- Regulatory Compliance, FDA, etc.
- MSDS & SARA
- Quality Control
- HACCP
- Lot Traceability
- Allergen Management
- Kosher

### Research & Development

- Formula / Recipe Management
- Packaging Bill-of-Material
- Laboratory Modelling
- Sample Management
- "What-if" Costing

### Quality Control

- Material Receipt
- Pre-release to Production
- In-process
- Finished Goods testing
- Pre-shipping
- Inventory re-test

### Web Services

- Remote Sales Order Entry
- Lot Explosion
- On-line Approvals
  - o Formula Changes
  - o Sampling Changes
  - o Purchase Requisitions
  - o Purchase Indents
  - o Sales Quotations

## Industries Served

- » Food & Beverage
- » Nutraceutical
- » Paint & Coatings
- » Cosmetic / Personal Care
- » Life Sciences
- » Specialty Chemical

## Other applications

- » BatchMaster Manufacturing Add-on for SAP Business One
- » BatchMaster Statistical Forecasting
- » BatchMaster Web Portal
- » BatchMaster B2B
