Top Ten Reasons to Partner with BatchMaster Software

10 Allows you to 'do business your way' by meeting your unique business needs

BatchMaster Manufacturing is designed and pre-configured for the process manufacturing industry including specialty industries such as Foods, Chemicals, Nutraceuticals, Pharmaceuticals, Cosmetics, Paints & Coatings, Bakeries, Beverages, Dressings & Sauces, and Seasonings & Additives and others. It speaks your language with formulations at the core of the solution. Off the shelf, BatchMaster Manufacturing contains the essential and unique distinctions required by your industry.

9 Ensures compliance with the most stringent industry regulatory requirements

With BatchMaster Manufacturing, your company will comply with your industry's regulatory mandates. Vital compliance requisites are met allowing you to fulfill obligations for FSMA, GFSI, GHS, SARA, and to organizations such as FDA, OSHA, EPA, ISO, DOT and other regulatory institutions. These necessary federal and state regulation requirements are easily met with the system's ability allowing unique material specifications, capturing electronic data, managing formula revisions, and providing full auditing of key business transactions and manufacturing records.

8 Delivers a complete, enterprise-wide solution

BatchMaster Manufacturing for Microsoft Dynamics GP offers a single, integrated solution that captures all critical business information and provides visibility into your entire business. Information is available for immediate access and use company-wide. Strengthen all aspects of business performance and communication and simplify learning using one user-interface and single login.

7 Ensures progression and performance as your business grows

Stay at the forefront of your industry by making a sound investment in a flexible solution that will adapt to your evolving business needs. BatchMaster Manufacturing for Microsoft Dynamics GP, along with Microsoft SQL Server, can scale easily from 5 to hundreds of users without compromising system performance. Our flexible pricing lets you buy what's needed for today and then add capabilities and additional users as your business grows.

6 Supports tailoring your solution without complicated IT efforts

With BatchMaster Manufacturing for Microsoft Dynamics GP's built-in personalization tools, you can quickly configure your system and add new capabilities. End users can create specialized views and new windows, automate tasks specific to your business, and build light applications. And if needed, custom development will be easier with familiar Microsoft technologies and industry standards.

BatchMaster Manufacturing for Microsoft Dynamics GP

5 **Expands insight across your entire organization**

Open the flow of information and offer business intelligence and analysis to key users without the need of full licenses. With secure access through the Microsoft Dynamics GP Business Analyzer from virtually any location, employees can view critical, role-based information and access templates for charts and KPIs, making collaboration with your team accessible and easy.

4 **Connects your people and systems**

Improve collaboration with built-in workflows allowing teams to move tasks from first step through final approval. Bring together employees and improve cooperation in manufacturing, compliance, formulation, financials, distribution and customer service by sharing files across all functions and through built-in integrations with Microsoft Dynamics CRM. Your employees can also synchronize calendar appointments, contacts, and tasks within Microsoft Outlook.

3 **Ensure success of implementation to realize ROI sooner**

Let our experienced professional services implementation team together with our Microsoft Dynamics GP business partners help you to reach your goals. Working together, we quickly setup core functionality and efficiently migrate data from legacy systems. Start-up time is reduced using tools and templates that can accelerate implementation. Our flexible deployment options including on premise, hosting and Cloud make it easier to maximize your IT budget and resources and realize your return on investment.

2 **Demonstrates a strategic choice for your business**

We are experts in process manufacturing and intend to be your strategic business partner. BatchMaster Software has been serving process manufacturers for over 30 years and offers the most complete solution available to process manufacturers. Our experience and history translates into a strong dedication to your business. You can be assured of our commitment to your company and to your industry.

1 **Count on innovation both now and into the future**

BatchMaster Manufacturing for Microsoft Dynamics GP delivers both rapid ROI and lower cost of ownership for one's investment with continuous product releases that support the changing needs of process manufacturers. BatchMaster provides a worldwide presence for support and continues its legacy of serving process manufacturing businesses like yours today and tomorrow.
